Managing and executing projects where business operations and human lives depend on their precision

# OUR DEFENSE FOCUS

For the defense industry, NetLander provides project management and program management support to commercial and government entities engaged in worldwide initiatives. We execute projects where business operations and human lives depend on precision. Since 1998, NetLander has run project management for command and control systems essential to space and missile defense at all 14 NASA centers nationwide.

## CONTRACTING ADVANTAGES

NetLander's contractor and consulting services offer significant cost and infrastructure savings to clients. NetLander allows large contractors to meet contractual small business requirements by partnering with NetLander. NetLander maintains active contract vehicles with:

- GSA
- Navy SEAPORT

## PROVEN MISSION-CRITICAL SUCCESS

With many defense systems using similar technology and software as the NASA/Aerospace arena, NetLander brings an in-depth knowledge of these systems along with extensive mission critical success.

With NetLander's success in NASA Mission Critical project management at KSC, it is clear that NetLander has the ability to assess needs, implement processes and anticipate and measure risks designed to mitigate crisis on complex projects involving multi-million dollar machinery and human life.

## MISSION PARTNER

NetLander is a leading project management company providing innovative systems, processes and solutions in aerospace, healthcare, information systems, and security to commercial and government customers worldwide.

## WE STAND BEHIND OUR TRACK RECORD

- NetLander has provided NASA Safety and Mission Assurance teams with standard processes and reviews for conducting business, which allows redeployment of resources without retraining individuals when they move from one division to another.
- Our experience translates into valuable knowledge and skill within the larger defense arena.
- Our teams are known for decisive, streamlined project management leadership steeped in the intense 'Mission Critical' environment.

## OUR CLIENTS SAY

### DOD Lockheed-Martin F-22 Raptor Fighter Plane

*We urgently needed some specialized IT Subject Matter Expertise, and we needed team members that could come up to speed in a hurry in order to keep the project on schedule for our client. We brought NetLander on to our team as a subcontractor, and working with our excellent team, we pulled it off together achieving project success on schedule and within budget for our client.*

– Al Menendez, President SCIS
